POKHARA UNIVERSITY

Level: Bachelor	Semester: Fall	Year : 2018
Programme: BE		Full Marks: 100
Course: Microprocessor and Assembly Language Programming		Pass Marks: 45
		Time : 3hrs.

Candidates are required to give their answers in their own words as far as practicable.

The figures in the margin indicate full marks.

Attempt all the questions.

1. a) Describe in brief the evolution of INTEL series. 8

   b) Draw the block diagram of 8085 Microprocessor. Explain about its register set. 7

2. a) Draw the timing diagram of 8085 instruction LDA CBD2H. 8

   b) What is addressing modes? Describe about the different addressing modes in 8085 microprocessor. 7

3. a) Describe about the format of an ALP, illustrating a simple program. 7

   b) Write an ALP for 8085 microprocessor to copy the largest value among ten values at starting address CB08H to CD00H. 8

4. a) Write an ALP to find the difference between two 8-bit numbers using two's complement method and display the difference in the screen. 8

   b) What are the different components of ALP Development tool? Describe their functions. 7

5. a) Differentiate between synchronous and asynchronous bus. 5

   b) List out the possible sources of interrupts. Also Describe the Polled Interrupt hardware with necessary diagram. 10

6. a) Explain 8259A modes of operation. How can we accommodate 18 interrupt sources with 8259A PIC? 8

   b) Describe in detail the working mechanism of USART with necessary diagram. 7

7. Write short notes on: (**Any two**) 2×5

   a) Addressing Decoding

   b) Interrupt Vector Table

   c) Application of 8254 PIT
